Spray Gun Offerings

Notice of Discontinuation

Dear Valued Customer,

We are reaching out to inform you that your account is directly impacted by upcoming changes in our product offering. Effective May 30, 2025, we will be restricting options available on the following lines:

- **SG** Spray Guns
- **DG** Dispense Guns
- **RC** Recirculating Spray Guns
- **N2** Nitro Spray Guns

This decision is part of our initiative to reduce lead times and improve stock levels. By streamlining our product range, we aim to enhance our inventory management and ensure more efficient service for all our customers.

To facilitate a smooth transition, please note that the last date for placing orders for the discontinued products will be May 30, 2025. After this date, select configurations will no longer be available.

We want to reassure you that we take these changes very seriously and are committed to supporting you throughout this transition. For your convenience, appendices summarizing the impact on SKUs and additional details will be included with this notice.

We apologize if this notice has reached the wrong contact within your organization. If you are not the appropriate person to receive this information, we kindly request that you forward it to the relevant individual or department. Should you need assistance with transitioning your current needs to our new product lines or have any questions regarding the discontinuation, please do not hesitate to contact our customer service team, or your sales representative.

Thank you for your continued support and understanding as we work to enhance our service and product offerings.

Sincerely,

Cory Simmons
Product Marketing Manager
White Knight Fluid Handling

Notice of Discontinuation	1
Appendix A – SG Spray Guns	3
Appendix B – DG Spray Guns	6
Appendix C – RC Spray Guns	8
Appendix D – N2 and Nitro Nitrogen Spray Guns	9

Appendix A – SG Spray Guns

iPolymer Spray Guns are constructed of virgin PTFE and Polypropylene to provide them with a long-life span in harsh acidic or corrosive environments. Due to their design and comfortable grip, iPolymer Spray Guns are quickly becoming the industry standard in semiconductor fab plants, wet benches and work processing stations.

To streamline our offerings, we have simplified the product line by reducing the SKU count to focus on our most popular options, omitting front trigger and hook options, and no longer offering tubing assemblies pre-assembled. Tubing assemblies remain active as accessories.

Product Discontinuations:

1. All Hose assemblies
2. FT front trigger selection
3. H Mounting hook option

Product Line Expansion:

1. KA FFKM O-ring Option

Appendix B – DG Spray Guns

iPolymer Spray Guns are constructed of virgin PTFE and Polypropylene to provide them with a long-life span in harsh acidic or corrosive environments. Due to their design and comfortable grip, iPolymer Spray Guns are quickly becoming the industry standard in semiconductor fab plants, wet benches and work processing stations.

To streamline our offerings, we have removed the DG line from our offering. The design is equivalent to the SG line with the only distinction in the nozzle shape. Product can be supported by ordering standard SG SKUs, and the dispense nozzle as a separate line item.

Appendix C – RC Spray Guns

iPolymer Recirculating Spray Guns all have molded PTFE bodies with PVDF pistons. These RC Guns are designed so that there is very little dead space for bacteria to grow. DI water is able to circulate up to the sealing seat throughout the entire gun and piston. From the sealing seat on, bacteria build up is kept to a minimum by using a 1/16" thick spray nozzle.

To streamline our offerings, we have restricted the configurations we offer the RC recirculating spray gun to limit to offerings with the hose factory installed due to the fixturing recommended for install of the return line.
