

USP Class VI Declaration of Conformity

Samples of PTFE, Copolymer PTFE and PFA provided by White Knight Fluid Handling, A Graco Company have been tested for compliance to USP Class VI (70°C) plastic. Testing was performed by Pacific BioLabs on September 16, 2015 in compliance with the standards published in the USP Biocompatibility Testing standards (USP<88>).

Tests of the provided material samples passed all requirements and have been approved for use in pharmaceutical applications where fluids which will enter the human body, will contact the material. Please note that the materials were not approved for permanent implantation with the human body.

The qualification of these materials qualifies the following White Knight products in applications requiring USP Class VI certifications:

- **PSA** Bellows Pumps
- **PSH** Bellows Pumps
- **PSU** Bellows Pumps
- **PFA** Bellows Pumps
- **PFH** Bellows Pumps
- **PFU** Bellows Pumps
- **PXA** Bellows Pumps
- **PXH** Bellows Pumps
- **PXU** Bellows Pumps
- **PSB** Diaphragm Pumps
- **PSD** PTFE Fluid path (diaphragm included) Diaphragm Pumps
- **RBA** Series Pressure Regulators
- **RFA** Series Pressure Regulators
- **CPA** series Pressure Vessels
- **FHA** Filter Housings
- **GA (Gauntlet)** Filter Housings
- **Catcher** Pre-filters
- **DBA** Pulsation Dampeners
- **DBH** Pulsation Dampeners
- **DBU** Pulsation Dampeners
- **PPMC** Low Flow Pumps
- **PEM** Metering Pumps
- **PPM** Metering Pumps
